

ICE SAFETY AND MUSIC POLICY:

- 1. In general, respect and watch out for other skaters. Advanced skaters need to exhibit patience toward newer, beginner skaters.**
- 2. Don't stand around talking on the ice (keep moving) and if you fall, get up quickly.**
- 3. Follow ice diagram when practicing jumps and spins.**
- 4. Look before skating away from the boards.**
- 5. Do not skate too closely to another skater. Also, no tandem/shadow skating allowed. New skaters should not be too close to advanced skaters who are spinning.**
- 6. Right of way: The skater wearing the vest has the right of way. Only one skater on the ice should be wearing the vest. Skaters taking a lesson have the right of way over general skaters in the session. No skating between a coach & skater in a lesson.**
- 7. No wearing of earbuds on the ice. Any recording taking place should be done by the boards and for coaching/analysis purposes only. Specific content creation for online platforms is not allowed. Coaches are exempt from this when they have an appropriate need for coaching, choreographic, or official SCCNY social media creation purposes.**
- 8. Music Policy: The skater or their coach will add their name to the sign up sheet for a music request (lesson requests on left, non-lesson requests on right). If there are requests on both sides of the sheet, two lesson music requests will be played and then one non-lesson request. Priority will be given to lesson requests during busy times. Skaters will have a maximum of two music requests per 45 minute session.**

There will be no starting over of music. Skaters must wear a vest when their music is playing. Be mindful of the volume of the music.
